"That son of a bitch. I knew he took my last beer."

These are words a man should never, ever have to say. But I muttered them to myself in an exasperated sigh of disgust as I closed the door to my refrigerator.

After a painfully long day of working, all I wanted was an ice cold beer. But it seemed my old friend James had (allegedly) stolen my last brew.

So I did what any man would do.

...I built a ***motion detection*** and ***home surveillance system*** with Python and OpenCV to catch any beer thieves that try to open my refrigerator:

Excessive?

Perhaps.

But I take my beer seriously.

To read more about how you can build a home surveillance system using **Python**, **OpenCV**, **Dropbox**, and your **Raspberry Pi**, [***just click here.***](#)

P.S. Just in case you didn't know, all source code from [Practical Python and OpenCV + Case Studies](#) is guaranteed to work out-of-the-box with the Raspberry Pi. Now you can **detect faces in images**, **track objects in video**, and **recognize handwritten digits** with your Raspberry Pi! [Click here to learn more.](#)
